**Grasp Technologies and Prime Numbers Technology Grow Their Strategic Partnership**

*The partnership provides immediate enhancement of Grasp's APEX platform.*

**SAN DIEGO, Cal.** – Grasp Technologies Inc. and Prime Numbers Technology, LLC announced today an enhanced strategic partnership adding features and functions from Prime Sourcing, Prime's contract analysis, monitoring, and modeling tool, to enhance Grasp's APEX sourcing platform. The enhancements provide a more robust solution for Grasp's air sourcing software and Prime benefits from Grasp's data expertise and workflow logic.

"We were working to enhancing the Grasp APEX platform, but when we saw what Prime had ingeniously created in its sourcing tool, we knew it was the missing piece," said Dave M. Lukas, VP and CSO of Grasp. "The partnership is a logical fit. We've both created complimentary products. The combined knowledge and joint solution helps both Grasp and Prime provide better technology, and overall experience for clients. It's a natural win-win," Lukas added.

For more than 15 years, Grasp and Prime have worked on a number of data-driven solutions and projects for clients.

"We've always had a close relationship with Grasp. They are great innovators. If we can find a way to work more closely to better our different solutions and help bring additional value to clients, it's a perfect scenario. We are glad to partner with Grasp more formally and we are excited about the potential to increase our market share together," said Mark Bresnahan, VP and General Manager of Prime.

Information about Grasp's APEX platform can be found at [www.grasptech.com](http://www.grasptech.com).

**About Grasp Technologies**

Grasp Technologies helps clients navigate constantly changing business environments by providing the right combination of custom and standardized data management solutions and support. Grasp was founded in 1996 and works extensively in the travel industry and other ancillary industries worldwide. Grasp has offices in San Diego, California and Columbus, Ohio.

**About Prime Numbers Technology, LLC**

Prime Numbers Technology is dedicated to helping clients drive significant savings in business spend through industry-recognized data analytics and benchmarking solutions. The company is led by a team of business professionals with tactical expertise in various travel and technology sectors including global distribution systems, travel management companies, travel suppliers, data analytics companies, and publicly traded IT developers.
